

RAJAT PATEL

Business Analyst | Data Analytics | Business Intelligence

Gurugram, Haryana • 8006443050 • rajatrathore577@gmail.com

PROFESSIONAL SUMMARY

Analytics professional who turns sales, marketing, and operations data into decisions — currently driving 30% faster reporting and a 17% sales lift at Hindware. Hands-on with SQL, Python, Power BI, and Tableau, plus the requirements-gathering and stakeholder communication that get insights actually adopted. Comfortable owning the work end-to-end: from the business question, to the dashboard, to the recommendation.

CORE SKILLS

- **Business Analysis:** Requirements gathering & documentation, stakeholder management, gap analysis, process mapping, market research
- **BI & Data Visualization:** Power BI, Tableau, KPI dashboards, Advanced Excel
- **Data & Querying:** SQL, Python, data modeling, ETL
- **Analytics:** Forecasting, predictive analytics, ROI & performance measurement

PROFESSIONAL EXPERIENCE

Marketing Executive – Analytics & Operations

2024 – Present

Hindware Ltd, Gurgaon

- Improved reporting efficiency by 30% and eliminated manual turnaround by translating documented stakeholder requirements into automated Power BI and SQL dashboards and data visualizations for sales and marketing teams.
- Drove a 17% increase in sales by leading end-to-end analytics for a QR-based customer loyalty program — defining KPIs, building the data model, and delivering retention insights to business stakeholders.
- Improved marketing ROI-tracking accuracy by 20% by analyzing sales and customer-engagement data in SQL and Python and reworking the campaign-measurement process to close data gaps.
- Sustained a 77% same-day resolution rate across 100+ daily operational queries by serving as the cross-functional data liaison between sales, operations, and after-sales teams and standardizing the query-tracking workflow.

Founder & Operations Analyst – Agribusiness Venture

2018 – 2022

Self-employed

- Improved profit margins by building Excel-based demand-forecasting and cost models that set pricing across the product line.
- Kept operating decisions data-driven by tracking and visualizing KPIs across production volume, sales turnover, and cost.
- Cut wastage and raised operational efficiency by mapping the inventory and supply-chain process and removing the steps driving the most loss.

Computer Operator – Data & Operations Support

2017

Ground Water Department, Bareilly

- Maintained 100% data accuracy across operational systems by validating, cleaning, and reconciling incoming records.
- Supported business reporting by building MIS reports and structured Excel datasets and resolving data issues with cross-functional teams.

KEY PROJECTS

- **Regional Sales Performance Analysis (Power BI, SQL):** Modeled product- and region-level sales across a beverage portfolio and built a filterable executive dashboard highlighting the regions and products driving the most revenue.
- **Retail Sales & Customer Segmentation (Excel):** Cleaned and structured raw transaction data and built a dashboard tracking sales by segment, season, and category to surface the highest-performing segments.

EDUCATION

- **Post Graduate Program in Data Analytics** — Imarticus Learning, Delhi | 2022 – 2024
- **B.Tech in Agriculture** — Monad University, Hapur | 2013 – 2017 | 72.5%

ADDITIONAL INFORMATION

- **Languages:** English, Hindi
